### Description of Firm

Acacia Environmental Group LLC (AEG) provides consulting services and guidance on a wide range of environmental issues, providing permitting, regulatory compliance, strategic environmental planning and specialized environmental compliance services.

- AEG provides environmental consulting services to manufacturing, energy and government clients in West Virginia and across the nation. We are highly regarded for multiple areas of environmental expertise, and we continue to grow and add new expertise to our firm.
- AEG's consultants include those with the following certifications/registrations: Professional Engineer, Professional Geologist, and Licensed Remediation Specialist.
- AEG's team is made up of senior and mid-level consultants who are well-versed in state and federal environmental regulations, in some cases regulations they have helped to define. Our personnel have worked on many complex projects involving sensitive issues that require experience and precision. AEG consultants bring a wealth of industry and environmental knowledge to our clients, which include several major manufacturers, energy companies and other businesses.
- AEG's consultants have held leadership positions in many of West Virginia's most influential business and environmental organizations, including the Environmental Committees of WVMA, WVONGA, WV Chamber, plus the WV Chapter of the Air & Waste Management Association.
- Acacia Environmental Group LLC has offices in Charleston and Clarksburg, WV and is a wholly owned subsidiary of the Jackson Kelly PLLC law firm.

### Services

AEG assists its clients in their efforts to comply with complex federal and state environmental regulations. AEG's clients are involved in a range of industries, including natural gas, coal, chemical, pharmaceutical, rubber, glass, metals, paper and wood products, aerospace and defense, automotive, coke, carbon black, fiberglass, material handling, bulk terminals and surface coating industries.

AEG helps resolve specific compliance issues, as well as designs and implements comprehensive compliance strategies in many areas, including:

- Air Permitting & Regulatory Compliance
- SARA Reporting
- GHG Reporting
- Water Permitting & Regulatory Compliance
- SPCC, Groundwater Protection and Stormwater Plans
